22 TO ALL PARTIES AND THEIR COUNSEL OF RECORD:  
23

24 On March 10, 2022 I spoke to Clerk DeWana Chambers. Ms. DeWana told me that  
25 I needed to clarify the issue I have regarding the mail situation. She further told me that I  
26 needed to clarify the items I am designating for the appeal record and that I needed to send  
27 this information to both Judge Gilliam, United States District Court and Judge Dennis

1 Montali, U.S. Bankruptcy Court, Northern District of California - San Francisco Division,  
2 450 Golden Gate Avenue, Mail Box 36099, San Francisco, CA 94102.

3       1. I am a man in his late-70's who is not very technologically advanced and live in  
4           an area where I get very spotty service. I am constantly having problems with  
5           my computer and missing emails. What I can count on is my mail being  
6           delivered by the U.S. Postal Service; however, it is currently taking  
7           approximately 6 to 8 days for me to get mail delivered that is being sent from  
8           California. I have not agreed to receive electronic notification because I cannot  
9           guaranty I will actually receive it and I need for mailing time to be included in  
any deadlines set for me.

10      2. The Exhibits I am designating for the appeal record are:

11           a. Exhibit "A" is the Armed Forces Institute of Pathology Report ("AFIP  
12           Report").

13           b. Exhibit "B" is the Diablo Canyon Nuclear Regulatory Commission  
14           ("NRC) permit material.

15           c. Exhibit "C" is the material from the County and State showing no proper  
16           permits were granted when I was exposed.

17           d. Exhibit "D" is correspondence from 2005-2006 showing that Appellee  
18           PG&E Corporation ("PG&E") via their counsel was aware of my exposure case  
19           at California Worker's Compensation Appeals Board.

20      3. My clarification statement for this appeal boils down to the fact that the Price  
21           Anderson Act which added Section 170 of the Atomic Energy Act of 1954 (42  
22           U.S.C. 2210) for radiation matters clearly states that the statute of limitations  
23           DOES NOT apply. This matter hinges for appeal on whether the United States  
24           Bankruptcy Court erred in its decision that California State Statute of  
25           Limitations applies even though the Price Anderson Act states otherwise and  
26           that at the time of exposure the facility was not properly permitted or licensed  
27           where the incident occurred and that PG&E is trying to be relieved of obligation  
in this matter.

1           4. Also, with PG&E filing bankruptcy and with my later stage of Worker's  
2           Compensation Court matter, in order to preserve all my rights pursuant to the  
3           Price Anderson Act and my claims thereto, I filed my bankruptcy matter as  
4           required and seen in all related radiation cases or matters.

5  
6 DATED: March/8, 2022

Respectfully submitted,

7           Wm. F. Weidman, III, Appellant

AFIP REPORT

00:S6875 A. Perianal area: Portions of skin with xanthosis, perifolliculitis and ~~perivascular infiltrate~~ as well as mild superficial acute and chronic inflammation of the dermis with fibrosis, dilated veins and mild atypia of stromal cells.  
B. Colon, sigmoid (polyps), biopsies: Fragments of colonic mucosa with focal suggestion of surface hyperplastic change and focal lymphoid nodules.  
C. Rectum (polyp), biopsy: Hyperplastic polyp.

The case was reviewed in consultation with the members of the Department of Environmental and Toxicologic Pathology.

The dilated veins and mild atypia of dermal stromal cells seen in the perianal area (A) could be due to a variety of causes including radiation.

## EVALUATION OF REQUEST FOR EXTENSION OF THE CONSTRUCTION PERMIT

### COMPLETION DATES FOR THE DIABLO CANYON NUCLEAR POWER PLANT, UNITS 1 AND 2

#### Introduction

On November 26, 1979, Pacific Gas and Electric Company (PG&E) filed a request for extension of the completion dates of the construction permits for the Diablo Canyon Nuclear Power Plant, Units 1 and 2. The extensions requested were from December 31, 1979 to September 30, 1980 for Unit 1 and from February 29, 1980 to March 31, 1981 for Unit 2. In the requests for extension PG&E stated that the additional time for Unit 1 was needed to conclude the licensing process and to comfortably accommodate the Commission's announcement of a pause in issuing operating licenses until spring 1980.

#### Discussion

The construction permit for Unit 1, CPPR-39, was issued on April 23, 1968, and was last modified by the Commission's Order dated July 11, 1979, which extended the latest completion date to December 31, 1979. The construction permit for Unit 2, CPPR-69, was issued on December 9, 1970, and was last modified by the Commission's Order dated April 1979, which extended the latest completion date to February 29, 1980.

Additional time contingencies will be required to allow for satisfactory completion of modifications and new requirements arising from the President's Commission and the NRC's staff investigation of the incident at the Three Mile Island Nuclear Power Plant, Unit 2 to the Diablo Canyon Nuclear Power Plants, Units 1 and 2, to the extent that they are applicable. Priority is being given to completing Unit 1.

Accordingly, PG&E has requested an extension of the latest completion dates in CPPR-39 for Unit 1 to September 30, 1980 and in CPPR-69 for Unit 2 to March 31, 1981.

#### Conclusion

The Commission's staff have reviewed the information provided in the applicant's submittal, and we conclude that the factors discussed above are reasonable and constitute good cause for delay; and the extension of construction of Unit 1 for 9 months and of Unit 2 for 13 months is justifiable.

8002270535

OFFICE	.....	.....	.....	.....	.....
SURNAME	.....	.....	.....	.....	.....
DATE	Case: 19-30088	Doc# 12051	Filed: 03/21/22	Entered: 03/21/22 13:44:32	Page 7 of 25

As a result of the staff's review of the Final Safety Analysis Report to date, and considering the nature of the delays, we have identified no area of significant safety considerations in connection with the extension of the construction permit completion dates for the Diablo Canyon Nuclear Power Plant, Units 1 and 2.

The assessment of potential environmental impacts associated with site preparation and the construction of Units 1 and 2 of the Diablo Canyon Nuclear Power Plant were addressed in the Final Environmental Statement (FES) issued in May 1973. Since the construction of Unit No. 1 is essentially complete except for installation of certain modifications and construction of Unit 2 is approximately 98% complete, essentially all construction impacts have occurred. The continuation of a limited construction work force on site for an additional 13 months is not expected to have any increased impact on the local environment or the nearby communities. The staff has determined that the extension of time for completion of work shown in Construction Permit No. CPPR-39 from December 31, 1979 to September 30, 1980 and in CPPR-69 from February 29, 1980 to March 31, 1981, is an administrative action since it does not alter impacts described in the FES or create new impacts not previously addressed in the statement. Having made this determination, the Commission has concluded, pursuant to 10 CFR Part 51.5 (d)(4), that an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of this extension of time.

The staff finds that this action does not involve a significant hazards consideration, that good cause exists for the issuance of an Order extending the completion dates, and that an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with the issuance of such order.

Accordingly, issuance of an Order extending the latest completion dates for construction of Diablo Canyon Unit 1, as set forth in CPPR-39, to September 30, 1980 and of Unit 2, as set forth in CPPR-69, to March 31, 1981, is reasonable and should be authorized.

IT IS HEREBY ORDERED that the latest completion date for CPPR-39 is extended from December 31, 1979 to September 30, 1980 for Unit 1 and the latest completion date for CPPR-69 is extended from February 29, 1980 to March 31, 1981 for Unit 2.

**Re: Occupational Radiation Exposure Records Request**

Dear Mr. Collins:

A review of our records indicate that the individual named William F. Weidman, SSN: [REDACTED] was not badged for occupational radiation at Pacific Gas & Electric Company's Humboldt Bay Power Plant.

In accordance with 10 CFR 19 and 20, Pacific Gas and Electric Company maintains occupational radiation exposure histories of all individuals assigned personal dosimetry as required by 10 CFR 20.1502. No dosimetry devices have been issued for the individual listed below.

Name: William F. Weidman

SSN: [REDACTED]

This report is furnished to you under the provisions of the Nuclear Regulatory Commission Regulation 10 CFR Part 19. You should preserve this report for further reference.

Sincerely,

A handwritten signature in black ink, appearing to read "ROY B. WILLIS".

**Re: Occupational Radiation Exposure History**

NAME: William F. Weidman

SSN: [REDACTED]

After a thorough search of our files, we have found no record of any entries into our Radiologically Controlled Areas during the requested time periods, (1984-1985.)

The above named individual:

was not monitored by Pacific Gas and Electric Company at Diablo Canyon Power Plant.

was monitored by Pacific Gas and Electric Company at Diablo Canyon Power Plant on dates other than those requested.

This report is furnished to you under the provisions of the Nuclear Regulatory Commission, regulation 10 CFR Part 19. You should preserve this report for further reference.

Sincerely,

Jeffrey D. Harker  
 Dosimetry and Technical Support Supervisor

Re: Weidman v. Bechtel Power Corp.  
Subpoena for Records to PG&E

Dear Mr. Chesney:

This will respond to your correspondence of August 14, 2011.

Regarding the employment-related records requested in your subpoena, I spoke to Steve Lorence, the Director of Human Resources at Diablo Canyon Power Plant. Mr. Lorence confirmed that Mr. Weidman was a contractor when he performed work related to the Diablo Canyon Power Plant. PG&E does not retain the employment-related records you requested for contractors. I suggest that you contact the agency that employed Mr. Weidman as a contractor in 1984-1986 for the records. Any records related to Mr. Weidman's access to Diablo Canyon Power Plant would not have been retained more than five years, per 10 CFR 73.56(o) (i), (ii), and (iii). Therefore, PG&E does not currently have any access records for Mr. Weidman.

As for the engineering records you requested in the subpoena, we previously checked the Diablo Canyon Power Plant records but were unable to locate any responsive documents from 1984-1986. As a courtesy to you, I will ask the appropriate representatives at the Diablo Canyon Power Plant to again check whether any responsive records are available. If responsive records are located, I will let you know as soon as possible.

Sincerely,

Emily Schultz

Re: William Weidman, III v. Bechtel Power Corp.  
WCAB Case No. ADJ3663372

Dear Mr. Chesney:

Enclosed are records to answer the Subpoena Duces Tecum dated January 25, 2012. The certification of these records will be forwarded under separate cover.

Also enclosed is a Certificate of Records of Regularly Conducted Activity indicating that we have no records for entry to radiologically controlled areas.

Thank you for your courtesy and patience.

Very truly yours,

Patricia A. Higa  
Attorney for PG&E
